

Nova Southeastern University  
Graduate School of Computer and Information Sciences  
**Course Syllabus**  
**MMIS 680 Human-Computer Interaction (3 credits)**

2008 Spring Term, March 31, 2008 – June 20, 2008, Online Format

---

**Professor:** Laurie P. Dringus, Ph.D., Professor  
Graduate School of Computer and Information Sciences  
Nova Southeastern University  
Carl DeSantis Building, 4<sup>th</sup> floor  
3301 College Avenue, Ft. Lauderdale, FL 33314  
Email: laurie@nsu.nova.edu  
Office location, Davie campus, room 4073  
Office: (954) 262-2073, Fax (954) 262-3915

**Class Location and Format:** Online using WebCT tools. Please note that some files and information resources are posted on my HCI website. Course Internet address:  
<http://scis.nova.edu/nova/hci/top.html>

**Course Description:**

The dynamics of human-computer interaction (HCI) are examined with a blend of theory and practice pertaining to the study of information systems. Provides a broad and comprehensive overview and offers specific background relating to user-centered approaches in the design and evaluation of information systems applications. Areas to be addressed include the user interface and software design strategies, user experience levels, interaction styles, usability engineering, web site usability, and collaborative systems technology. Students will perform formal interface evaluations and usability tests applied to current information systems technology.

**Required Textbooks:**

1. Sharp, H., Rogers, Y., & Preece, J. (2007). *Interaction Design. Beyond Human-Computer Interaction*. Second edition. Somerset, NJ: John Wiley & Sons. ISBN: 9780470018668.  
Note to the student: A general HCI text is required. Please choose EITHER the text by Sharp, et al, or B. Shneiderman and C. Plaisant's classic text (*Designing the User Interface*, 4<sup>th</sup> edition).
2. Barnum, C.M. (2002). *Usability testing and research*. New York: Longman. ISBN: 13:9780205315192. Note to the student: If you have difficulty getting the Barnum text, you may select any general text on usability, especially any of those indicated with a \* in the bibliography section of this syllabus. (Jordan or Nielsen or Rubin, for example). There are several usability texts that will suffice for this course.
3. Selected ACM articles. See Reading Schedule in the Course Guide. ACM articles can be accessed online through the NSU Electronic Library, the ACM Digital Library Database. See the Course Schedule for specific reading assignments throughout the term.

**Learning Objectives:**

Upon completion of the MMIS 680 course, the student will:

1. Gain insight into the field of human-computer interaction and its role in the study of information systems.
2. Understand how information systems design practices and methods can be integrated with human factors principles and methods now being employed.
3. Identify interfaces and components of systems.
4. Gain a conceptual foundation for the HCI design process, including design principles and goals, models of user knowledge, interaction styles, design guidelines, and assessment of user interface design.
5. Understand the difficulties and pitfalls of translating theory and principles derived from research findings, into practical advice on user interface design.
6. Apply metaphorical reasoning and conceptual models to user interface design.
7. Describe the major aspects of usability engineering.
8. Apply usability and design principles to the evaluation of current interfaces.
9. Apply suitable methods for collecting users' requirements and analyzing users' tasks.
10. Perform usability analyses and evaluate product design.
11. Synthesize the information systems research literature effectively.
12. Understand how computer systems can enhance collaboration in the context of work organization.
13. Assess societal impacts of information systems.

**Possible Course Topics (summary):**

Human-Computer Interaction as an emerging field

User experience levels

Interaction design strategies

Interface metaphors and conceptual models

HCI and Web design

Online documentation and help systems

HCI, the Internet and user behavior

HCI and security

Usability concepts and usability evaluation

Social Computing

Research in HCI

**MMIS 680 HCI Course Requirements:**

*Course Activities:* Students will conduct independent research and produce scholarly projects. In addition, students will contribute to the asynchronous discussion forums in WebCT, throughout the term. Contributions will count as points toward the class participation grade. See the section on Student Forums in the addendum Course Guide for instructions/expectations on contributing to the online conference discussions.

**In addition to the required asynchronous discussions in WebCT, the major course requirements will consist of two assignments.**

Instead of the typical midterm and final examinations, two assignments or projects are required that will enable the student to synthesize the major issues and relevant research currently being examined in the field of human-computer interaction.

**Assignment #1:** An objective and scholarly software or interface evaluation paper. Due date is: **Sunday, May 4, 2008.**

**Assignment #2:** Conduct and report a usability evaluation. Due date is: **Sunday, June 15, 2008.**

**IMPORTANT:** Specific instructions for completing these assignments are contained in the addendum Course Guide. Assignments must be submitted according to the due dates specified in this syllabus. Late assignments must be **pre-approved** by the professor and will likely result in point reduction. **ALL ASSIGNMENTS REQUIRE OUTSIDE LITERATURE RESEARCH AND ACTIVITY.** Assignments **must** be submitted online through the assignment submission link in WebCT. Do not email or fax assignments.

**Grading Scale and Criteria:**

A	.....	192-200 points
A-	.....	186-191 points
B+	.....	180-185 points
B	.....	174-179 points
B-	.....	168-173 points
C+	.....	162-167 points
C	.....	156-161 points
F	.....	0-155 points

Grading Criteria For the 680 course:

Assignment #1	75 points
Assignment #2	100 points
Class Participation (Forums)	25 points
	-----
	200 points total

## **School and University Policies and Procedures:**

Students must comply with the policies published in the school's *Graduate Catalog* and the *NSU Student Handbook*, some of which are included or referenced below. The catalog is at [http://www.scis.nova.edu/NSS/pdf\\_documents/Catalog.pdf](http://www.scis.nova.edu/NSS/pdf_documents/Catalog.pdf). The handbook is at <http://www.nova.edu/cwis/studentaffairs/forms/ustudenthandbook.pdf>.

**1. Standards of Academic Integrity** For the university-wide policy on academic standards, see the section Code of Student Conduct and Academic Responsibility in the *NSU Student Handbook*. Also see the section Student Misconduct in the GSCIS catalog.

Each student is responsible for maintaining academic integrity and intellectual honesty in his or her academic work. It is the policy of the school that each student must:

- Submit his or her own work, not that of another person
- Not falsify data or records (including admission materials and academic work)
- Not engage in cheating (e.g., giving or receiving help during examinations; acquiring and/or transmitting test questions prior to an examination; and using unauthorized materials, such as notes, during an examination)
- Not receive or give aid on assigned work that requires independent effort
- Properly credit the words or ideas of others according to accepted standards for professional publications (see *Crediting the Words or Ideas of Others*)
- Not use or consult paper writing services, software coding services, or similar services for the purpose of obtaining assistance in the preparation of materials to be submitted for course assignments or for theses or dissertations
- Not commit plagiarism (*Merriam-Webster's Collegiate Dictionary* (1996) defines plagiarism as "stealing or passing off ideas or words of another as one's own" and "the use of a created production without crediting the source.") (see *Crediting the Words or Ideas of Others* below)

### *Crediting the Words or Ideas of Others*

When using the exact words of another, quotation marks must be used for short quotations (fewer than 40 words), and block quotation style must be used for longer quotations. In either case, a proper citation must also be provided. The *Publication Manual of the American Psychological Association, Fifth Edition*, (2001, pp. 117 and 292) contains standards and examples on quotation methods.

When paraphrasing (summarizing, or rewriting) the words or ideas of another, a proper citation must be provided. (*Publication Manual of the American Psychological Association, Fifth Edition* (2001) contains standards and examples on citation methods (pp. 207–214) and reference lists (pp. 215–281)). The *New Shorter Oxford English Dictionary* (1993) defines paraphrase as “An expression in other words, usually fuller and clearer, of the sense of a written or spoken passage or text...Express the meaning (of a word, phrase, passage, or work) in other words, usually with the object of clarification...” Changing word order, deleting words, or substituting synonyms is not acceptable paraphrasing—it is plagiarism, even when properly cited. Rather than make changes of this nature, the source should be quoted as written.

**Addendum by this professor: Additional requirement for this course -- overuse of direct quotes will not be acceptable in papers for this course. Direct quotes should be used sparingly, if only necessary. Points will be reduced in papers where excessive direct quoting is used. It is better instead to paraphrase and properly cite the work.**

### *Original Work*

Assignments, exams, projects, papers, theses, dissertations, etc., must be the original work of the student. Original work may include the thoughts and words of another author but such thoughts or words must be identified utilizing quotation marks or indentation and must properly identify the source (see the previous section *Crediting the Words or Ideas of Others*). At all times, students are expected to comply with the school’s accepted citation practice and policy.

Work is not original when it has been submitted previously by the author or by anyone else for academic credit. Work is not original when it has been copied or partially copied from any other source, including another student, unless such copying is acknowledged by the person submitting the work for credit at the time the work is being submitted, or unless copying, sharing, or joint authorship is an express part of the assignment. Exams and tests are original work when no unauthorized aid is given, received, or used before or during the course of the examination, reexamination, and/or remediation.

## **2. Writing Skills**

Students must demonstrate proficiency in the use of the English language. Grammatical errors, spelling errors, and writing that fails to express ideas clearly will affect their grades and the completion of their academic programs. The faculty will not provide remedial help concerning grammatical errors or other writing difficulties. It is the student’s responsibility to proofread and edit his or her work which, in both form and content, should be letter-perfect. Work that is not properly edited will be rejected. It is university policy that students must submit their own work, not that of another person. Consequently, they should refrain from using outside editors to redo their work.

### **3. Disabilities and ADA**

NSU complies with the American with Disabilities Act (ADA). The university's detailed policy on disabilities is contained in the NSU *Student Handbook*. Student requests for accommodation based on ADA will be considered on an individual basis. Students with disabilities should discuss their needs with their academic advisors before the commencement of classes if possible.

### **4. Communication by Email**

Students must use their NSU email accounts when sending email to faculty and staff and must clearly identify their names and other appropriate information, e.g., course or program. When communicating with students via email, faculty and staff members will send mail only to NSU email accounts using NSU-recognized usernames. Students who forward their NSU-generated email to other email accounts do so at their own risk. GSCIS uses various course management tools that use private internal email systems. Students enrolled in courses using these tools should check both the private internal email system and NSU's regular email system. NSU offers students web-based email access. Students are encouraged to check their NSU email account daily.

### **5. The Temporary Grade of Incomplete (I)**

The temporary grade of Incomplete (I) will be granted only in cases of extreme hardship. Students do not have a right to an incomplete, which may be granted only when there is evidence of just cause. A student desiring an incomplete must submit a written appeal to the course professor at least two weeks prior to the end of the term. In the appeal, the student must: (1) provide a rationale; (2) demonstrate that he/she has been making a sincere effort to complete the assignments during the term; and (3) explain how all the possibilities to complete the assignments on time have been exhausted. Should the course professor agree, an *incomplete contract* will be prepared by the student and signed by both student and professor. The *incomplete contract* must contain a description of the work to be completed and a timetable. The completion period should be the shortest possible. In no case may the completion date extend beyond 30 days from the last day of the term for master's courses or beyond 60 days from the last day of the term for doctoral courses. The *incomplete contract* will accompany the submission of the professor's final grade roster to the program office. The program office will monitor each *incomplete contract*. If a change-of-grade form is not submitted by the scheduled completion date, the grade will be changed automatically from I to F. No student may graduate with an I on his or her record.

**Addendum by the professor:** *Incompletes will NOT be granted for MMIS 680.*

## **6. Grade Policy Regarding Withdrawals**

Course withdrawal requests must be submitted to the program office in writing by the student. Requests for withdrawal must be received by the program office by the calendar midpoint of the course (see dates in the academic calendar in the catalog and program brochures or at: [http://www.scis.nova.edu/NSS/pdf\\_documents/AcadCal.pdf](http://www.scis.nova.edu/NSS/pdf_documents/AcadCal.pdf)). Withdrawals sent by email must be sent from the student's assigned NSU email account. Requests for withdrawal received after 11:59 p.m. EST on the withdrawal deadline date will not be accepted. Failure to attend class or participate in course activities will not automatically drop or withdraw a student from the class or the university. Students who have not withdrawn by the withdrawal deadline will receive letter grades that reflect their performance in the course. When a withdrawal request is approved, the transcript will show a grade of W (*Withdrawn*) for the course. *Students with four withdrawals will be dismissed from the program.* Depending on the date of withdrawal, the student may be eligible for a partial refund (see the appropriate catalog section Refund Policy Regarding Withdrawals).

## **7. Acceptable Use of Computing Resources**

Students must comply with the university's *Policy on Acceptable Use of Computing Resources* (see *NSU Student Handbook*).

## **8. Academic Progress, Grade Requirements, and Academic Standing**

Students must be familiar with the school's policies which are contained in its catalog.

## **9. Student Research Involving Human Subjects**

Students must be familiar with the university's policy (see paragraph in catalog).

## **10. Responsibility for Payment of Tuition and Fees**

Once registered, students are personally responsible for the payment of their tuition and fees. Returned checks, cancelled credit cards, employer or agency refusal to pay, ineligibility for financial aid, and other reasons for non-payment may result in a direct bill to the student, and/or referral to a collection agency.

Payment and refund policies are based on the view that a student registering for a class is reserving a place in that class and that tuition and fees cover the opportunity to secure that place in the class. Since no other person can purchase that place, the student is responsible for the tuition and fees associated with it. Simply not attending does not constitute a reason for non-payment.

**11. Miscellaneous rules:** (1) A student may neither do additional work nor repeat work to raise their grade. (2) Literature research is required for all work in this course. (3) Follow NSU IRB policy on Student Research (see Instructions for Completing Assignment #2). (4) Adhere to all deadlines – late arrivals will likely result in point reduction. (5) To receive full class participation points, every student must make steady contributions to the online Student Forums in order to keep a healthy communication going throughout the term. (6) No work from another course may be used in MMIS 680. (7) There will be no incompletes given for MMIS 680.

**Prepared by Laurie P. Dringus, Ph.D. and Maxine Cohen, Ph.D.**  
**Bibliography and Suggested Texts:**

\* Recommended texts on usability evaluation and testing

Note to the student: It is highly suggested that you investigate these sources as reference materials for your assignment/project work. Also, master's students may refer to the Reading Assignments Addendum list for articles to be used as reference materials.

In addition, it is highly suggested that you visit the ACM SIGCHI Web site, publications page, for other available journals and conference proceedings. Some journals and proceedings are available full-text online. Check it out: [www.acm.org/sigchi/publications/](http://www.acm.org/sigchi/publications/)

**Course Schedule (See also the Reading Assignments--Selected ACM Articles Addendum in the Course Guide): (This reading schedule is based on the new 2<sup>nd</sup> edition (2007) Sharp, Rogers, and Preece text.)**

<u>Week</u>	<u>Topic/Activity</u>	<u>Tasks/Reading</u>
1	Introduction to Human-Computer Interaction and Interaction Design; Usability Concepts	Sharp (2007): Ch. 1, 6 Barnum: Preface and Ch. 1 Read articles
2	SIGCHI resources; Understanding interaction; Usability concepts	Visit HCI Exploration Links (available online on the HCI Online Web Site Sharp (2007): Ch. 2 Barnum Ch. 2 Read articles
3	Understanding Users; Human Aspects of HCI <u>Student Forums start online and continue throughout the term</u>	Sharp (2007): Ch. 3, 5 Read articles
4	Intro to Usability Eval & Testing	Sharp (2007): Ch. 12, 13 Barnum: Ch. 4 Read articles
5	HCI and the Web; HCI and Security <u>Assignment #1 Due on or before May 4, 2008</u>	Barnum: Ch. 9 Read articles
6	User Requirements; Conceptual Design; User Centered Approaches	Sharp (2007): Ch. 9, 10 Barnum: Ch. 5
7	Observing Users; Usability Methods	Sharp (2007): Ch. 7, 8, 15 Barnum: Ch. 3 Read article
8	Usability Test Planning	Barnum: Ch. 6, 7
9	Testing and Modeling Users	Sharp (2007): Ch. 14 Barnum: Ch. 8
10	Making A Difference: Recommending Changes	Read articles
11	Social Computing <u>Assignment #2 Due on or before June 15, 2008</u>	Read article Barnum: Appendix
12	The Future of HCI (wrap up)	no specific readings

**Note:** This reading schedule is only a guide to help you read the texts in an organized way. You may read ahead or read several chapters concurrently. Our online discussions will include many themes, but may not necessarily follow the order of the reading schedule. Also, lecture notes will be posted in several threads.
